CONSOLIDATED TRANSLATION SURVEY

PREFACE

This survey is prepared monthly from lists received through the cooperation of US government agencies and includes universities, research institutions, and commercial translation organizations. It is a compilation of projects completed or started during the preceding month.

Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date of publication, and publication identification of the completed project are given when available. Tables of contents of journals translated cover-to-cover are reproduced from the current publications.

Projects in process, i.e., not completed as of the date of this survey, are noted with an asterisk (*), and when available, a project-control or "in-process" number is noted in parentheses following the title. Certain details may be unavailable on such projects. New projects in process are not listed again until they are completed.

An index to authors of items in this issue is provided at the end of the survey.

Scientific and technical translations are grouped according to the COSATI subject category list except for military science and ordnance items which are listed under "military" in the appropriate geographic areas.

Geochemistry International contains selected articles from a cover-to-cover translation of *Geokhimiya*, a journal devoted to geochemistry, published by the Academy of Sciences, U. S. S. R., together with selected translated geochemical papers from other languages, but primarily from Russian, German, French, and Japanese. A list of periodical publications is regularly searched for papers of geochemical interest, and readers and subscribers will do the Editor a service by suggesting papers for consideration for translation and publication. Topical coverage is the same as that found in the Society's journal, *Geochimica et Cosmochimica Acta*, or in *GEOKHIMIYA*, and includes distribution of elements, geochronology, geochemical prospecting, biogeochemistry, geochemistry of hydrocarbons, phase equilibria studies, stable isotope distribution, wall rock alteration, zoning in ore deposits, paragenesis, petrology, and mineralogy.

Subscription rates: \$50 per year; \$10 per issue.

Foreign postage: \$1.25 per year.

Back volumes and issues of *Geochemistry International* (1964 and 1965) available at current subscription rates from the American Geological Institute.

Back volumes and issues of *Geochemistry*, the cover-to-cover translation of *GEOKHIMIYA* published separately (1956-1963) are available in limited numbers from the American Geological Institute at \$25 per volume and \$4 per issue.

Ms. Roberta Schoen
Deputy Director for Operations
Defense Technical Information Center
7725 John J. Kingman Road
Suite 0944
Ft. Belvoir, VA 22060

Dear Ms. Schoen:

In February of this year, DTIC provided the CIA Declassification Center with a referral list of CIA documents held in the DTIC library. This referral was a follow on to the list of National Intelligence Surveys provided earlier in the year.

We have completed a declassification review of the "Non-NIS" referral list and include the results of that review as Enclosure 1. Of the 220 documents identified in our declassification database, only three are classified. These three are in the Release in Part category and may be released to the public once specified portions of the documents are removed. Sanitization instructions for these documents are included with Enclosure 1.

In addition to the documents addressed in Enclosure 1, 14 other documents were unable to be identified. DTIC then provided the CDC with hard copies of these documents in April 2004 for declassification review. The results of this review are provided as Enclosure 2.

We at CIA greatly appreciate your cooperation in this matter. Should you have any questions concerning this letter and for coordination of any further developments, please contact Donald Black of this office at (703) 613-1415.

Sincerely,

A handwritten signature in dark ink, appearing to read "Sergio N. Alcivar".
